

→ Data Narrative

1 Nestled in the heart of Guangdong, Zhaoqing's climate tells a story as rich as its heritage. **2** Did you know, **3** the hottest months are from May to August? **4** It's a symphony of heat, **5** where daily mean temperatures often flirt with the mercury's upper 30°C. But the city doesn't just tip its hat to the sun. **6** Rainfall plays its part, **7** especially in May and June, **8** where it reaches its crescendo with over 250mm, **9** making it a weather sonata of heat and rain. But like every masterpiece, Zhaoqing has its quieter notes too. **10** The chill of winter finds its way, **10'** **11'** **11** with December's average low at a cool 12.5°C and a record low that dips to an almost freezing 1.7°C. **12** The rain seems to sense the need for tranquility, **13** with precipitation also taking a back seat in winter.
